Explanation of symbols used;— C.=Cases; D.=Deaths.

NEW DELHI 3 (INDIA);

The 5th June, 1950.

8. P. JAIN,

for Registrar General, India.

NATIONAL SAVINGS ERTIFICATES

Are now available in three different series, maturing after 5.7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100. 500, 1,000 and 5,000 and you can invest upto Rs. 25,000 in them (inclusive of any Post Office cash certificates held).

full particulars obtainable from all post offices, District Organisers of the Simon-Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simia.

TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT

Births and deaths from principal diseases in towns with a population of over 30,000 in India for the week ending the 13th May, 1950

[•] In cases of towns where has been in abnormal movement of population, it is likely that the population estimates may not be sufficiently reliable for calculating the birth and death rates.

[†] Figures not available.

Explanation of symbols used:—B.~Births; B.R.=Birth rate; C=Cholera; S.=Smallpox; P=Plague; F.=Fevers; D.D.=Dysentery and Diarrhoa; R.D.=Respiratory Diseases; M.D.=Meternal deaths; D.R.=Death rate, I.D.=Infantile deaths (included in total deaths).

REMARKS

The figures of births and deaths shown in this statement for the week ending the 13th May, 1950 relate to 177 towns with an estimated population of 22,563 thousands. The total number of towns is 233 and their population is 28,421 thousands. Thus 76% of the total number of towns representing 79% of the total population is covered in the statement. The numbers of births and deaths recorded in these towns were 11,886 and 10,328 representing birth and death rates of 27.4 and 23.8 per thousand of population respectively.

(A) States (Parts A & C).—The data here relate to 161 towns with an estimated population of 20,593 thousands. Information about Assam, Bihar and Madhya Pradesh could not be included. The total number of towns is 201 and their population is 24,668 thousands. Thus 80% of the total number of towns representing 83% of the total population is covered. The numbers of births and deaths recorded in these towns were 10,811 and 9,672 representing birth and death

rates of 27.3 and 24.4 per thousand of population respect ively. The table at the end gives the position by States.

The towns of Etawah, Hathras, Jhansi, Sitapur and Banaras in Uttar Pradesh recorded high death rates of 79.8, 59.3, 57.8, 56.2 and 52.7 per thousand of population respectively. In Etawah, the high death rate was mainly due to deaths from fevers and respiratory diseases. In Jhansi and Sitapur, the high death rates were largely due to deaths from fevers and smallpox, in Hathras to fevers and in Banaras to fevers, respiratory diseases and dysentery and diarrhoea.

(B) States (Part B).— The data here relate to 16 towns with an estimated population of 1,970 thousands. The total number of towns is 32 and their population is 3,753 thousands. Thus 50% of the total number of towns representing 52% of the total population is covered. The numbers of births and deaths recorded in these towns were 1,075 and 656 representing birth and death rates of 28.4 and 17.3 per thousand of population respectively.
